Text page 1

File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.

File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.

Text page 2

File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.

File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.

Text page 3

File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.

File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
File sizes shrink when the encoder spends fewer bits on detail the eye cannot see. Photographs tolerate heavy compression, screenshots do not, and scanned pages sit somewhere in between.
